

Checking the integrity of your ACCPAC data on a regular basis has never been easier! Unattended Data Integrity Checker enables you to schedule when your ACCPAC data is to be checked and maximizes system resource usage by allowing you to automatically perform the checking overnight, whilst the system is not being used.

Unattended Data Integrity Checker enables you to:

- ✓ Schedule ACCPAC to check your data integrity unattended
- ✓ Automatically dump your data to a user defined subdirectory for backup purposes
- ✓ Specify which companies and which modules need to be checked
- ✓ Make use of Windows Scheduler to set up a recurring job so that you don't forget
- ✓ Installs as a standard ACCPAC module

Benefits

- ✓ Your accounting data is of critical importance and needs to be checked on a regular basis
- ✓ Unattended Data Integrity Checker will give you peace of mind knowing that your data is being checked on a regular, recurring basis
